

WORKING WITH OTHER PROFESSIONALS POLICY (reviewed Jul 2022)

In order to best support children at Little Acorns we believe in the importance of working with other professionals.

This includes transferring information from and to another setting. Staff have set procedures in recording information to another setting or professional.

Before this is done we obtain parental consent for us to contact other professionals.

We ask for parental permission to send settling reports to Health Visitors, and welcome opportunities to chat through any concerns we may have with them. We will always keep parents informed about matters raised. We also follow advice and guidance from other professionals regarding specific children – for example targets to support communication from the Speech and Language Therapist.

At the end of the children's time here we pass Transition information onto the relevant schools or other settings.

We aim to work in partnership with other professionals and share appropriate information accordingly; especially in regard to Child Protection issues.
